- **Other skills**   Design Systems Engineering, Community Management, Teaching/Mentoring & Organizing Sessions

Work Experience

Frontend Software Engineer   **Current, since Jan 2023**
at joinclamp.com

- Building a complete platform for buying/purchasing digital asset indexes and managing your crypto portfolio.
- Using **Javascript, React, NextJS, TailwindCSS** for building frontend and UI. Using **Figma** to design layouts and design system.

Product Design & Frontend Engineering (OSS Contributor)   **Seasonal**
at **AsyncAPI Initiative** (AsyncAPI Initiative's Mentorship Program 2022-23)

- Started contributing as a design contributor and contributed to AsyncAPI's website project using **ReactJS** and **TailwindCSS**
- Working on **auditing** existing components created using TailwindCSS support; Fixed UX for components, improved layouts for upcoming features
- Tools I work with during contribution: Figma, Git/GitHub, Slack, Netlify, **Storybook**, React, TailwindCSS, **NextJS**, Javascript

Software Engineer - Frontend (Internship)   **July 2021 - Dec 2021**
at economize.cloud

- Worked on the a dashboard application frontend using **VueJS, SCSS** and re-vamping the components of the same.
- Builded a complete **design system** for all the applications using VueJS and SCSS.
- Learned about tools and technologies such as GoLang, **Redis** and AWS.

Project & Work

HEKORS Website   github.com/hekors/website
- Managing a complete website project for HEKORS Community; Created using **React, NextJS, TailwindCSS, RadixUI, Typescript.**
- Building complete database using **Strapi CMS**

Volunteer & Community Work

Engineering & Design Lead, Community Manager   **Present**
at HEKORS community, github.com/hekors

- Building a space for learners to get knowledge of **real-world engineering, design,** and **soft-skills** through various sessions, hackathons and 1:1 meetups.
- Managing everything from website, event planning, mentoring people, and managing a complete team of builders. Helping people to contribute to real-world projects and making them learn technologies through development and design.
- Collaborating with other communities and helping them organize better events, meetups in local cities.
